

Cloudberry

Ядро PostgreSQL 16

```
postgres=# INSERT INTO users_staging (id, email, name)
```

```
VALUES
```

```
(1, 'user1@example.com', 'Alice Smith'),
```

```
(2, 'user2@example.com', 'Bob Jones'),
```

```
(3, 'user3@example.com', 'Carol Lee'),
```

```
(4, 'user4@example.com', 'David Kim'),
```

```
(5, 'user5@example.com', 'Eva Patel');
```

```
INSERT 0 5
```

```
postgres=# MERGE INTO users AS u
```

```
USING users_staging AS s ON u.id = s.id
```

```
WHEN MATCHED THEN UPDATE SET email = s.email, name = s.name
```

```
WHEN NOT MATCHED THEN INSERT (id, email, name, created_at)
```

```
VALUES (s.id, s.email, s.name, NOW())
```

```
;
```

```
MERGE 5
```

Greenplum 6

Ядро PostgreSQL 9.4

```
postgres=# INSERT INTO users_staging (id, email, name)
VALUES
(1, 'user1@example.com', 'Alice Smith'),
(2, 'user2@example.com', 'Bob Jones'),
(3, 'user3@example.com', 'Carol Lee'),
(4, 'user4@example.com', 'David Kim'),
(5, 'user5@example.com', 'Eva Patel');

INSERT 0 5

gp=> MERGE INTO users AS u
USING users_staging AS s ON u.id = s.id
WHEN MATCHED THEN UPDATE SET email = s.email, name = s.name
WHEN NOT MATCHED THEN INSERT (id, email, name, created_at)
VALUES (s.id, s.email, s.name, NOW())
;
